→ Specifications

- **Weight**
  69.9 lbs (31.7 kgs)
- **Dimensions**
  50.9" H x 14" W x 17" L (1293mm H x 355.6mm W x 431.8mm L)
- **Cold Tank Capacity**
  3 gallons (11 Liters)
- **Hot Tank Capacity**
  0.5 gallons (2 Liters)
- **Dispense Area**
  12" tall (305mm)
- **Recommended Water Pressure**
  60-70 PSI
- **Rated Voltage/Frequency**
  120v/60hz | 220v/50hz
- **Power Consumption**
  Hot: 2.5A/300W | Cold: 1.0A/120W

→ The Pure Water Technology Purification Process

Unfiltered Water	Sediment Filter	Carbon Block Filter	0.0001 Micron Membrane	Granular Activated Carbon Filter	Boost™ Filter*	Activated Oxygen
	(Reduces Sediment - Dirt, Rust and Silt)	(Reduces Organics - Lead, Chemicals, Solvents and Chlorine)	(Reduces Inorganics - TDS, Dissolved Metals and Arsenic)	("Polishes" Water For Great Taste)	(Adds Alkalinity, Minerals and Electrolytes)	(Maintains Water Freshness and System Cleanliness)

*Optional feature

PW90: Touchless Water Purification System

Touchless Sensor Activation

Hygienic, touch-free operation.

Anti-Microbial Surface

Anti-microbial additive maintains cleanliness of unit exterior.

High-Capacity Drip Tray

Optional drain connection prevents need for emptying.

Energy-Saving Mode

Eco-Mode for reduced power consumption.

Advanced Purification Technology

Proprietary, multi-stage, reverse osmosis process is certified to industry standards.

Activated Oxygen Self-Cleaning

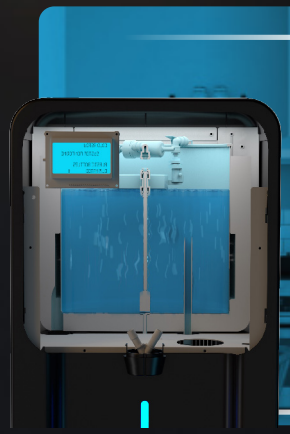

Advanced technology circulates water and cleans tanks and lines to maintain water freshness.

24/7 System Monitoring

Continuous monitoring of system performance and water quality with real-time status displayed on LCD screen and bluetooth compatible service app.

→ Advanced Hygiene Features

Deep-Clean Mode

This feature automatically cleans the cold water reservoir, water lines and drip tray. Deep-Clean Mode is pre-programmed to activate when the system is not in use. It works by injecting a concentrated amount of activated oxygen into the cold water reservoir. That water is then automatically dispensed into the drain-connected drip tray, cleaning the system.

The Deep-Clean Mode is fully customizable, allowing control over the timing and frequency of cleaning, as well as the desired concentration of activated oxygen.

Auto-Circulation Freshness Cycle

This feature automatically dispenses a programmed volume of water into the drain-connected drip tray after a predefined period of non-use. This cycle helps prevent stagnant water in the filters or lines. This feature is great for businesses with holiday breaks, schools with summer breaks, or any prolonged period of non-use.

The Auto-Circulation Freshness Cycle can be programmed to customize the desired duration of non-use prior to initiation of the cycle, as well as the volume of water dispensed.

For more information about Auto-Circulation Freshness Cycle, including how to activate it, please contact PWT dealer technical support: **(855) 534-8332.**
